2019-2020 Assortment Plans Requirements by Category - Regular and Specialty Products

The table of requirements by category for regular and specialty products for fiscal 2019-2020 has just been published on the homepage of the SAQ-B2B website.

You have one (1) month to submit or update your spontaneous product offers (OS). During this period, no product analysis will be done by the SAQ. Beginning **Monday, February 18, 2019**, we will consult the SAQ Catalog of Offers as opportunities and requirements arise. Although you will still be able to submit an offer after that date, it may not be analyzed if the category it belongs to already has been.

When an offer is analysed, a message will be sent to the supplier and/or agent. When an offer is refused, its status will revert to "Draft" so you can update it for future analysis.

The SAQ may refuse to analyze an offer if the product concerned has previously been tasted and not been selected.
