

# Information Bulletin

To all agents and suppliers

---

## **New Requirements of the Safe Food for Canadians Regulations to Enter into Effect**

To comply with the [Safe Food for Canadians Regulations](#), the SAQ will be implementing a system for tracing the lots it receives and the quantities for each order received.

We therefore want to inform all our suppliers that they will have to have a documented traceability system in place by July 15, 2020.

At a minimum, the traceability system will have to include the following information:

- 1) The SAQ order number
- 2) The lot/batch number(s) for the lots/batches in the order
- 3) The case numbers for each lot/batch.

We will provide additional details in the coming months.

For more information, please contact  
our Business Relations Assistance Service (SARA),  
through [Contact SARA](#) or at 514 254-2711.
